

In Case You Missed It: Water Institute Director Meselhe Interviewed with the Weather Channel's Weather Underground Program

BATON ROUGE, LA. – Jan 12, 2016 – Ehab Meselhe, Ph.D., P.E., Director of Natural Systems Modeling and Monitoring, recently interviewed with the Weather Channel's Weather Underground program to discuss current events related to the Mississippi River and opening of the Bonnet Carre Spillway.

In the Interview, Dr. Meselhe provided technical knowledge of the Spillway and its role in diverting a portion of floodwater from the Mississippi River to Lake Pontchartrain, and essentially to the Gulf of Mexico, to help protect New Orleans and downstream communities from the rising waters.

The interview aired LIVE on Friday, January 8 at 6:30 p.m. Weather Underground is an online program of The Weather Company that supplies weather data solutions to many leading media companies, millions of users across the globe and over 180,000 weather stations worldwide.
