

JARED FALCON

IT Manager

Jared Falcon, IT Manager, brings years of experience in Information Technology (IT) with expertise in cybersecurity, network and server administration, and help desk support. Jared graduated from Louisiana State University with a bachelor's degree in information systems and decision sciences with a focus on management of information resources, information technology project management and business data communications. Prior to joining The Water Institute, Jared was the IT Administrator for the Baton Rouge Area Foundation for eight years where he installed and maintained a networking infrastructure, applied cybersecurity best practices, and provided help desk services to BRAF and associated organizations across Louisiana.
