

Melissa M. Baustian, Ph.D.
Coastal Ecologist, The Water Institute of the Gulf

T: 225.228.2106
E: mbaustian@thewaterinstitute.org

1110 River Road South, Suite 200
Baton Rouge, LA 70802

Education

Ph.D. in Oceanography and Coastal Sciences, August 2011
Louisiana State University, Baton Rouge, Louisiana

M.S. in Oceanography and Coastal Sciences, August 2005
Louisiana State University, Baton Rouge, Louisiana

B.S. in Biology, May 2003
Iowa State University, Ames, Iowa

Research Interests

coastal ecology; aquatic ecology; benthic ecology, benthic-pelagic coupling, eutrophication, hypoxia

Professional Experience:

The Water Institute of the Gulf <ul style="list-style-type: none">• <i>Coastal Ecologist</i>	2013-Present
RESTORE Act Center of Excellence for Louisiana <ul style="list-style-type: none">• <i>Director</i>• <i>Deputy Director</i>	2017-Present <i>2019- Present</i> <i>2017-2018</i>

Recent Research Projects

Impact of Climate-driven Shifts in Vegetation on Carbon Dynamics in Marsh Food Webs

The Water Institute of the Gulf, Baton Rouge, Louisiana

In Louisiana, continued winter warming and drought conditions are projected to influence the spread of tropical mangrove species in coastal marshes leading to ecosystem-level shifts between salt marsh grass (*Spartina alterniflora*) / black mangrove (*Avicennia germinans*) ecotones. While mangroves are already present in coastal Louisiana, it is unknown how they might alter the structure and function of food webs at the salt marsh edge, which is an essential nursery habitat for commercially and recreationally important fish, shrimp and crabs. We are measuring stable isotope abundance of $\delta^{13}\text{C}$, and $\delta^{15}\text{N}$ of specific primary producers and consumers to determine if the importance of available carbon sources in marsh food webs differ along a coastal salt marsh/mangrove gradient. Therefore, as mangroves expand, it is critical to determine if shifting basal carbon sources (plant material, phytoplankton, and soil organic matter) for marsh consumers will alter food web structure in marsh habitats. Collaborating with Dr. Mike Polito (Louisiana State University), Ms. Christina Powell (MS student, Louisiana State University) and Mr. Brandeus Davis (BS student, Louisiana State University). Funded by Louisiana Sea Grant.

Modeling Diversion Related Nutrients

Louisiana Coastal Protection and Restoration Authority (CPRA), Baton Rouge, Louisiana

Basin-wide Model Development. Coordinated and oversaw project activities related to modeling (Delft3D) the potential nutrient effects from diverted Mississippi River water. Implemented and led estuarine field and laboratory data collection (estuary open water and sediments, wetland vegetation and soils) to help validate the current basin-wide conditions (Barataria and Breton Basins, Louisiana) and for future nutrient effects from proposed sediment diversions. Led collaborative efforts with sub-contractors (e.g., Deltares, ULL, LSU) to meet project deadlines. Developed and led worksessions with external experts to gain input on nutrient-related modeling progress. Managed project budget as well as junior staff, research interns and undergraduate workers. Collaborated with researchers and their teams from The Water Institute of the Gulf, including Dr. Ehab Meselhe and Dr. Mead Allison.

Incorporating Nutrient Effects into Modeling

Louisiana Coastal Protection and Restoration Authority (CPRA), Baton Rouge, Louisiana

Provided technical expertise on the potential impacts of nutrients from sediment diversions to the coastal ecology of Louisiana. Elicited expert input about the influence and uncertainties of nutrient enrichment to wetland vegetation, soils and estuarine pelagic and benthic habitats. Used experts, literature and available data to develop a work plan that incorporated nutrient dynamics into a simulation model. Collaborated with researchers from The Water Institute of the Gulf, including Dr. Ehab Meselhe and Mr. Leland Moss.

Decomposition and Accumulation of Organic Matter Across a Salinity Gradient

The Water Institute of the Gulf's Science and Engineering Plan, Baton Rouge, Louisiana

Investigating potential climate change effects on coastal vegetation and ecosystem processes in coastal Louisiana. Estimating coast wide decomposition and carbon accumulation rates from four main, salinity driven, marsh habitats within coastal Louisiana to better understand how climate change or management actions could influence long-term changes in salinity and associated ecological processes. Collaborating with scientists from The Water Institute of the Gulf, including Dr. Tim Carruthers and Mr. Leland Moss as well as collaborators from U.S. Geological Survey National Wetland and Aquatic Research Center (Dr. Camille Stagg) and Gulf South Research Corporation (Ms. Carey Perry).

Benthic-pelagic Coupling in Aquatic Ecosystems

Center for Water Sciences, East Lansing, Michigan State University

Researching the ecological effects of nutrient enrichment on the benthic-pelagic coupling mechanisms in lakes by analyzing data from the 2007 USEPA National Lakes Assessment (n = 1000 lakes). Organized large data set with MS Access and SAS. Applying structural equation modeling with software SPSS AMOS and SAS to test hypotheses. Lead author on a review paper that discussed benthic-pelagic coupling mechanisms in fresh and marine ecosystems and their likely ecological responses to common stressors. Collaborated with Dr. Jan Stevenson from Michigan State University.

Coupling Socioeconomic and Ecological Systems for Water Sustainability

Center for Water Sciences, Michigan State University, East Lansing, Michigan

Collaborating with interdisciplinary water researchers at the MSU Center for Water Sciences to determine and synthesize the essential contemporary and historical factors that couple human and aquatic systems, funded by the NSF Water, Sustainability and Climate program. Developing a systems dynamic model with an environmental economist to couple human and ecological systems by studying the impacts of anthropogenic nutrient and fecal pollution from Clinton River watershed to the ecosystem services of Lake St. Clair, Great Lakes. Synthesizing data for model parameters. Hosted a one-day stakeholder workshop (May 2012) to gain knowledge and refine conceptual model. Led the team in project management, including field collection of sediment vibracores from Lake St. Clair and Clinton River and for analyses of ecological and water-borne pathogenic paleoindicators. Collaborated with Dr. Joan Rose (Michigan State University), Dr. Jan Stevenson (Michigan State University) and Dr. Georgia Mavrommati (Dartmouth University).

Microphytobenthos in the northern Gulf of Mexico Hypoxic Area

Louisiana State University & Louisiana Universities Marine Consortium, Baton Rouge, Louisiana

Conducted benthic ecological research to determine the composition and distribution of microphytobenthos (benthic algae + cyanobacteria) in northern Gulf of Mexico hypoxic region. Developed sampling protocol and experimental set-up to test hypotheses of presence of microphytobenthos and oxygen dynamics in the bottom water. Analyzed sediment and water samples for phytopigments and taxa composition of microalgae and cyanobacteria from water and sediment samples. Collaborated with Dr. Nancy Rabalais (Louisiana Universities Marine Consortium) and Dr. Eugene Turner (Louisiana State University).

Awards, Honors:

- Coastal Steward 2018, awarded by Coalition to Restore Coastal Louisiana, given to those that demonstrated outstanding commitment to the coast and made significant contributions to the restoration and conservation of Louisiana's coastal wetlands. May 2018.
- Awarded travel funds to attend the ASLO-sponsored *Ecological Dissertations in Aquatic Sciences* (Eco-DAS X) week-long symposia that fosters sustained, cross-disciplinary interactions among the top new researchers in ecological oceanography and limnology, Honolulu, HI, October 2012
- Joseph Lipsey, Sr. Memorial Scholarship Award, "For Excellence in the Studies of Marine Sciences," Department of Oceanography and Coastal Sciences, LSU, Spring 2009
- Dr. Theodore B. Ford Memorial Scholarship, Department Oceanography and Coastal Sciences, LSU, Fall 2008
- Second place for excellent presentation at Graduate Student Symposium, LUMCON, Spring 2008
- SEASPACE, Inc. scholarship for academic excellence, Spring 2006
- Honored in the "Top 50" student presentations at the Estuarine Research Federation conference, Norfolk, VA, Fall 2005

- “Honorable Mention” for an excellent presentation at Graduate Student Symposium, Cocodrie, LA, Spring 2005
- “Outstanding Undergraduate Student Award”, Iowa Water Resources Research Institute, Spring 2003 (given to only one undergraduate in the state of Iowa per year)
- “Outstanding Upperclassman Award,” ISU Biology/Zoology/Genetics Club, ISU, Fall 2002
- Iowa State University Study Abroad Scholarship, ISU, Fall 2002
- Nominated for “Student Employee of the Year” by Animal Ecology Department, ISU, Fall 2001
- Beta, Beta, Beta Biological Honor Society, ISU, 2001 - 2002
- Mortar Board Honor Society, ISU, 2001 - 2002
- Iowa State University Dean’s list: Fall 2001, Fall 2002, Spring 2003
- Iowa Veterans Foundation scholarship, Fall 2000
- *Culver’s* restaurant VIP Leadership scholarship, Fall 1999

Teaching Experience

Introduction to Water Quality – Delft3D modeling short course
Environmental Issues & Public Policy
EnvironMentors
Introduction to Oceanography
Marine Field Geology

Professional Memberships

Member, Association for the Sciences of Limnology and Oceanography (ASLO)
Member, Coastal and Estuarine Research Federation (CERF)
Member, Gulf Estuarine Research Society (GERS)

Committee Memberships

Science Service and Outreach

- Peer-reviewer for journals: Continental Shelf Research, Ecosystems, Estuaries and Coasts, Freshwater Biology, Global Change Biology, Hydrobiologia, J of Restoration Ecology, Marine Ecology Progress Series, Marine Pollution Bulletin
- Peer-reviewer for institutions: USGS, US EPA
- Peer-reviewer for funding agencies: Florida Sea Grant, Louisiana Sea Grant, National Science Foundation, The Water Institute of the Gulf
- Interviewed with journalists and reporters:
 - GRIST online news. Greta Moran. 11/26/18. Discussed why wetlands soils are great at storing carbon. <https://grist.org/article/wetlands-are-a-natural-climate-solution-guess-whos-turning-them-into-big-polluters>
 - NOLA.com, Sara Sneath. Discussed harmful algal blooms. 7/12/18. https://www.nola.com/environment/index.ssf/2018/07/a_tiny_sea_worm_could_be_a_vec.html
 - CWWPRA WaterMarks magazine. Sharon Coogle. 5/16/18. <https://lacoast.gov/new/Data/WaterMarks/Watermarks58WEB.pdf>
 - Radio interview (WHYY in Philadelphia) with journalist, Zoe Sullivan about why soil organic matter holds water. 5/10/18
 - BRAF Currents (Q1, 2018) – Discussed Atchafalaya SwampBase. <https://www.braf.org/stories/2018/2/6/fuc3414qh6ob46400vq359ou59atb0>
 - Participated in a radio interview about coastal change in Louisiana with Mr. Doug Daigle (30 min), for Environmental Update on 96.9 FM WHYR.org, 9/8/17
- Guest lecturer, Nicholls State University, Dr. Jonathan Willis. 2/27/18.
The Water Institute of the Gulf’s Integrated Approach to Applied Research.

- Guest expert scientist for Louisiana Universities Marine Consortium's (LUMCON) inaugural science communication event, OCEANDOTCOMM. Discussed coastal habitats of Louisiana with communicators (n=42) via social media, radio interviews, podcasts, and blogs. Examples out of 26 products are:
 - Pod cast: Coastal Louisiana Coastal Habitat Change - Season 1 Ep4
<https://open.spotify.com/episode/2iKtwwegodKplHoWVlhX3a?si=Z2AmPOAMOCyIijUS11XzCQ>
Interviewed by: Sheanna Steingass and Andrew Lewin
 - Radio interview, Instagram story: Bayou Women
<http://www.laseagrant.org/communications/voices/bayou-women/>
- Video Interview (2 hr) for outreach exhibit at State of Louisiana Coastal Protection and Restoration Authority and LSU's Center for River Studies, Water Campus, Baton Rouge, LA 7/26/17
- Hosted a volunteer high school student from St. Joseph's Academy to get exposure to environmental work, 8/2/17
- Answered questions in a telephone interview (30 min) from High School science teacher (Ms. Annie Tete) from S. McGeehee School, New Orleans, LA, 8/11/17
- Discussed swamp ecology with The Lens reporter via telephone interview, 9/28/17
- Applied research outreach presentation to YSI workshop (30 min), 10/19/17
- Interviewed by journalist about mangrove expansion that was published in the Baton Rouge Area Foundation (BRAAF) magazine *Currents*, page 20, June 2017.
https://static1.squarespace.com/static/56bba43086db4378db7e026d/t/58fe18ecbe6594f266ee1b38/1493047544667/Currents+Q217_website.pdf
- Discussed mangrove expansion into salt marshes to educate science teachers that are part of the LSU Coastal Roots program, Baton Rouge, LA, January 2017. <http://coastalroots.lsu.edu/>
- Answered questions via Skype about careers in science from high school girls of McGehee High School (via Ms. Annie Tete), New Orleans, LA, Nov. 2016
- Interviewed for a documentary about nutrient pollution in Mississippi River watershed and impacts to coastal Louisiana led by Water Quality Indiana, a class project from Ball State University. Baton Rouge, LA. Sept. 2016. waterqualityin.com See YouTube video here: <https://youtu.be/1125AxuZ2N8>
- Guest speaker at Pre-K classroom (4-5 year olds) for their ocean theme, developed 3 activities about the ocean, Southdowns PreK, Baton Rouge, LA, May 2015
- Discussed coastal Louisiana habitats and common organisms to general public as part of The Water Institute of the Gulf exhibition at the 2015 Kenilworth STEM Expo, February 2015
- Answered emailed questions about marine science careers from a student at Southeastern University, Hammond, LA, July 2014
- Guest lecturer for Coalition to Restore Coastal Louisiana and Brown University about *Coastal Hypoxia*, Annunciation Mission, New Orleans, LA April 2014.
- Guest lecturer at Mason Area Historical Society about *History of Water Quality in the Great Lakes*, Mason, MI, May 2013. <http://www.masonmuseum.org/Home.html>
- Guest speaker at preschool classroom (2-3 year olds) for their ocean theme, Michigan State University Child Development Laboratory, East Lansing, MI, Feb. 2013
- Mentor for the ASLO Multicultural Program at Aquatic Sciences Meeting. Met with minority students daily to help navigate the meeting and to help meet other scientists. New Orleans, LA, Feb. 2013.
- Conference judge for student oral and poster presentations:
 - State of the Coast, New Orleans, LA, June 2018
 - American Geophysical Union, New Orleans, LA, Dec. 2017
 - Coastal and Estuarine Research Federation, Providence, RI, Nov. 2017
 - Gulf Estuarine Research Society, Pensacola Beach, FL, November 2016
 - International Association for Great Lakes Research, West Lafayette, IN, May 2013
 - Association for Sciences of Limnology and Oceanography, New Orleans, LA, Feb. 2013
 - Coastal and Estuarine Research Federation, Daytona Beach, FL, Nov. 2011

- Participant in the development and planning of the state of Louisiana *Environmental Literacy Plan* part of the *No Child Left Inside* initiative, July 2010 to Aug. 2011
- Science Fair Judge:
 - LSU Chapter of *EnvironMentors*, Scotlandville Magnet High School, Baton Rouge, LA, April 2014, April 2015
 - Scotlandville Magnet High School, Baton Rouge, LA, Nov. 2010
 - Terrebonne Parish Science Fair (Jr. High), Baton Rouge, Louisiana, Dec. 2008
 - St. Joseph's Academy, Baton Rouge, Louisiana, 9th-12th grade, Spring 2007
 - Louisiana State Region VII, 9th -12th grade, LSU Field House, Spring 2007
 - Baton Rouge Earth Day Festival volunteer:
 - The Water Institute of the Gulf's activity, *Testing our Coastal Waters*, April 2015
 - The Water Institute of the Gulf's activity, *Testing our Coastal Waters*, April 2014
 - LUMCON's interactive animal specimen display, April 2010
- Volunteer scientist for LUMCON's weekend-long workshop titled *From H-2-O* that helped local science teachers develop lesson plans and activities that engage students in the importance of water quality, Jan. 2009
- Answered emailed questions about careers in science from a student of St. Amant High School, Ascension Parish School District, LA, Jan. 2009
- Mentored an international high school science fair recipient on a research cruise to learn more about hypoxia in aquatic systems, Summer 2008
- Volunteer scientist for the NSF funded program, Centers for Ocean Science Education Excellence (COSEE) - Central Gulf of Mexico Teacher/Scientist Institute, a week-long intensive workshop at LUMCON, Summer 2007
- Education Outreach Coordinator for Marine Environmental Researchers (MER), LSU, Fall 2006 - Spring 2007
- Active volunteer for Louisiana Sea Grant sponsored event, *Ocean Commotion*, Fall 2004 – 2010, 2014, 2016
- Taught first graders at University Laboratory School about the ocean, Baton Rouge, LA, Fall 2007
- Co-lead MER to create a booth at Polk Elementary School Science Fair, Baton Rouge, LA, Fall 2005
- Educated the public about the *Dead Zone* at LUMCON's open house, 2004, 2006, 2008
- Invited K-12 students into the LSU laboratory to teach them about marine macrobenthos, Baton Rouge, LA, Spring 2004

Training Courses

- Macrobenthic Organisms as Indicators of Estuarine Health. November 2016. Pensacola Beach, FL.
- Compass: Communicating Your Science. September 2016. Lacombe, LA.
- R Software Training Workshop, January 14, 2015, Baton Rouge, LA
- Delft3D Water Quality Modeling Workshop, March 16-17, 2014, New Orleans, LA
